HELIX ORANGE TOKEN SALE GENERATION ICO – JOIN THE NEXT STEP OF INVESTING EVOLUTION!

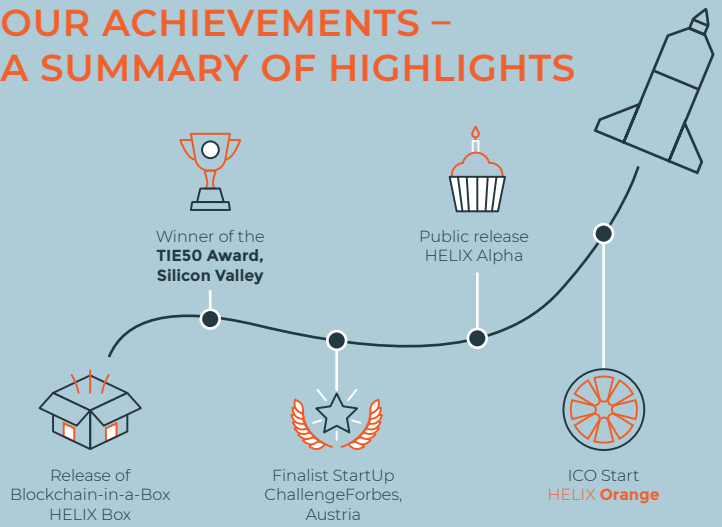

HELIX ORANGE IS AN ICO-PLATFORM FOR INVESTORS & ICO PROJECTS BUILT ON BLOCKCHAIN TECHNOLOGY. Our goal is to establish the sustainable ecosystem for investors and ICO projects.

WE BELIEVE IN ICO. ICOs are going to change the game and represent the next step in the evolution of investment models. We are convinced that ICOs have the potential to strengthen the democratic nature of our economic system. In the long term, ICOs will replace some other forms of financing.

WE WILL BUILD A BRIDGE BETWEEN CRYPTO AND REAL ECONOMY. The purpose of our ICO is to raise capital to develop and establish an ICO marketplace with a trusted investors' pool and an ICO listing. The platform identifies the legal and regulatory requirements of investor's country of residence and determine the volume to which the investor can participate in a given ICO. This increases legal certainty for all parties.

GENERATION ICO IS COMING.

OUR ACHIEVEMENTS – A SUMMARY OF HIGHLIGHTS

OUR ROADMAP - WHAT TO EXPECT IN 2018 & 2019

OUR MISSION IS TO DEVELOP THE WORLD'S FIRST SUSTAINABLE ICO ECOSYSTEM FOR INVESTORS AND ICO PROJECTS.

HIX TOKEN

We create a utility token, which can be used for purchasing services on the HELIX Orange platform. Once token have been used for a purchase, we will not circulate them anymore, but either burn them or keep them for future service offerings. Thus, following a mechanism suggested by Vitalik Buterin, the amount of token in circulation will decrease over time, leading to deflation. Furthermore, based on practical experience of other ICOs, we expect due to the network effects that the value of the investor services of the HELIX Orange platform will rise with an increasing number of investors registered and ICO projects listed. We expect several exchanges to list the HELIX Orange token (ticker symbol HIX) for trading.
